Welcome to BTEC Level 2 qualifications in WorkSkills for Effective Learning and Employment

We are delighted to introduce our new qualifications, which will be available for teaching from September 2010. These qualifications conform with the requirements of the new Qualifications and Credit Framework (QCF).

Focusing on the BTEC Level 2 qualifications in WorkSkills for Effective Learning and Employment

These qualifications have been developed to support apprenticeship induction, the learning of Employment Rights and Responsibilities (ERR), and personal learning and thinking skills (PLTS). The structures also include the opportunity to supplement learning with Edexcel WorkSkills units.

Straightforward to implement, teach and assess

Implementing BTEC qualifications could not be easier. They are designed to fit easily into your curriculum and can be studied independently or alongside existing qualifications, to suit the interests and aspirations of learners. The clarity of assessment makes grading learner attainment simpler.

Engaging for everyone

Learners of all abilities flourish when they can apply their own knowledge, skills and enthusiasm to a subject. BTEC qualifications make explicit the link between theoretical learning and the world of work by giving learners the opportunity to apply their research, skills and knowledge to work-related contexts and case studies. These applied and practical BTEC approaches give all learners the impetus they need to achieve and the skills they require for workplace or education progression.

Recognition

BTEC qualifications are understood and recognised by a large number of organisations in a wide range of sectors. BTEC qualifications are developed with key industry representatives and Sector Skills Councils (SSC) to ensure that they meet employer and learner needs.

All you need to get started

To help you off to a flying start, we have developed an enhanced specification that gives you all the information you need to start teaching BTEC. This includes:

- information on rules of combination, structures and quality assurance, so you can deliver the qualifications with confidence
- explanations of the content's relationship with the learning outcomes
- guidance on assessment, and what learners must produce to achieve the unit.

Don't forget that we are always here to offer curriculum and qualification updates, local training and network opportunities, advice, guidance and support.

What are BTEC Specialist qualifications?

BTEC Specialist qualifications are qualifications at Entry Level to Level 3 in the Qualifications and Credit Framework (QCF) and are designed to provide specialist work-related qualifications in a range of sectors. They give learners the knowledge, understanding and skills that they need to prepare for employment. The qualifications also provide career development opportunities for those already in work. Consequently, they provide a course of study for full-time or part-time learners in schools, colleges and training centres.

BTEC Specialist qualifications provide much of the underpinning knowledge and understanding for the National Occupational Standards for the sector, where appropriate. They are supported by the relevant Standards Setting Body (SSB) or Sector Skills Council (SSC). A number of BTEC Specialist qualifications are recognised as the knowledge components of Apprenticeships Frameworks.

On successful completion of a BTEC Specialist qualification, learners can progress to or within employment and/or continue their study in the same or related vocational area.

Care needs to be exercised when registering learners as the titling conventions and titles for the revised QCF versions of the BTEC Level 2 Firsts and BTEC Level 3 Nationals have changed.

The QCF is a framework which awards credit for qualifications and units and aims to present qualifications in a way that is easy to understand and measure. It enables learners to gain qualifications at their own pace along flexible routes.

There are three sizes of qualification in the QCF:

- Award (1 to 12 credits)
- Certificate (13 to 36 credits)
- Diploma (37 credits and above).

Every unit and qualification in the framework will have a credit value.

The credit value of a unit specifies the number of credits that will be awarded to a learner who has achieved the learning outcomes of the unit.

The credit value of a unit is based on:

- one credit for those learning outcomes achievable in 10 hours of learning
- learning time – defined as the time taken by learners at the level of the unit, on average, to complete the learning outcomes of the unit to the standard determined by the assessment criteria.

The credit value of the unit will remain constant in all contexts, regardless of the assessment method used for the qualification(s) to which it contributes.

Learning time should address all learning (including assessment) relevant to the learning outcomes, regardless of where, when and how the learning has taken place.

Edexcel BTEC Level 2 Award

The Edexcel BTEC Level 2 Award gives learners the opportunity to support specific aspects of their apprenticeship learning without committing to a larger qualification. The structure allows learners to undertake an induction unit and then select from ERR, PLTS or Edexcel WorkSkills units.

Edexcel BTEC Level 2 Extended Award

The Edexcel BTEC Level 2 Extended Award gives learners the opportunity to support a range of aspects of their apprenticeship learning. The structure allows learners to undertake an induction unit and then select ERR **and** PLTS or Edexcel WorkSkills units.

Edexcel BTEC Level 2 Certificate

The Edexcel BTEC Level 2 Certificate gives learners the opportunity to support a range of aspects of their apprenticeship learning. The structure allows learners to undertake an induction unit and then select several ERR, PLTS and Edexcel WorkSkills units.

Key features of the Edexcel BTEC Level 2 qualifications in WorkSkills for Effective Learning and Employment

The Edexcel BTEC Level 2 Qualifications in WorkSkills for Effective Learning and Employment have been developed to give learners the opportunity to:

Assessment

All units within these qualifications are internally assessed. The qualifications are criterion referenced, based on the achievement of all the specified learning outcomes.

To achieve a 'pass' a learner must have successfully passed **all** the assessment criteria.

Guidance

The purpose of assessment is to ensure that effective learning has taken place to give learners the opportunity to:

- meet the standard determined by the assessment criteria and
- achieve the learning outcomes.

Evidence to demonstrate achievement of the assessment criteria should be kept in a portfolio that is indexed and referenced to the units and grading criteria. This evidence may fall naturally out of the Apprentices' BTEC Apprenticeship programme and the portfolio of evidence towards achieving the BTEC technical certificate and Edexcel NVQ or competence qualifications. Adopting a holistic approach to assessment in this way leads to more effective use of the assessors' time and reduces the burden of assessment on the Apprentices.

Where naturally occurring evidence is not available, assignments may be devised to provide evidence generating opportunities. All assignments created by centres should be reliable and fit for purpose, and should be built on the unit assessment criteria. Assessment tasks and activities should enable learners to produce valid, sufficient and reliable evidence that relates directly to the specified criteria. Centres should enable learners to produce evidence in a variety of forms, including performance observation, presentations and posters, along with projects, or time-constrained assessments.

Centres are encouraged to emphasise the practical application of the assessment criteria, providing a realistic scenario for learners to adopt, and making maximum use of practical activities. The creation of assignments that are fit for purpose is vital to achievement and their importance cannot be over-emphasised.

The assessment criteria must be indicated clearly in the assignments briefs. This gives learners focus and helps with internal verification and standardisation processes. It will also help to ensure that learner feedback is specific to the assessment criteria.

When designing assignments briefs, centres are encouraged to identify common topics and themes. A central feature of vocational assessment is that it allows for assessment to be:

- current, ie to reflect the most recent developments and issues
- local, ie to reflect the employment context of the delivering centre
- flexible to reflect learner needs, ie at a time and in a way that matches the learner's requirements so that they can demonstrate achievement.

Qualification grade

Learners who achieve the minimum eligible credit value specified by the rules of combination will achieve the qualification at pass grade.

In the Edexcel BTEC Level 2 Specialist qualifications each unit has a credit value which specifies the number of credits that will be awarded to a learner who has achieved the learning outcomes of the unit. This has been based on:

- one credit for those learning outcomes achievable in 10 hours of learning time
- learning time being defined as the time taken by learners at the level of the unit, on average, to complete the learning outcomes of the unit to the standard determined by the assessment criteria
- the credit value of the unit remaining constant regardless of the method of assessment used or the qualification to which it contributes.

Quality assurance of centres

Edexcel BTEC Level 2 specialist qualifications provide a flexible structure for learners enabling programmes of varying credits and combining different levels. For the purposes of quality assurance, all individual qualifications and units are considered as a whole.

Centres delivering Edexcel BTEC Level 2 specialist qualifications must be committed to ensuring the quality of the units and qualifications they deliver, through effective standardisation of assessors and verification of assessor decisions. Centre quality assurance and assessment is monitored and guaranteed by Edexcel.

For Work Based Learning centres that are delivering Edexcel level 2 specialist qualifications as part of an approved BTEC Apprenticeship programme the Edexcel quality assurance process will involve:

- centre approval for those centres not already recognised as a centre for BTEC Apprenticeships
- approval for the Edexcel BTEC Apprenticeship
- 2 visits annually by sector specialist Apprenticeship Standards Verifiers
- the sampling of completed units that have been assessed either during the Standards Verifier's visit or remotely, subject to mutual agreement
- for those units that are submitted for standards verification, at least 50% should have been internally verified.

For centres that are delivering Edexcel Level 2 specialist qualifications as stand alone qualifications, the Edexcel quality assurance processes will involve:

- centre approval for those centres not already recognised as a centre for BTEC qualifications
- approval for Edexcel BTEC Level 2 qualifications and units
- **compulsory** Edexcel-provided training and standardisation for internal verifiers and assessors leading to the accreditation of lead internal verifiers via the OSCA system

- quality review of centre verification practice
- centre risk assessment by Edexcel of overarching processes and quality standards
- remedial training and/or assessment sampling for centres identified through standardisation or risk assessment activities as having inadequate quality, assessment or internal verification processes.

Approval

Centres are required to declare their commitment to ensuring the quality of the programme of learning and providing appropriate assessment opportunities for learners that lead to valid and accurate assessment outcomes. In addition, centres will commit to undertaking defined training and online standardisation activities.

Centres already holding BTEC approval are able to gain qualification approval online. New centres must complete a centre approval application.

Quality assurance guidance

Details of quality assurance for Edexcel BTEC Level 2 qualifications are set out in centre guidance which is published on our website (www.edexcel.com).

Programme design and delivery

Mode of delivery

Edexcel does not normally define the mode of delivery for Edexcel BTEC Entry to Level 3 qualifications. Centres are free to offer the qualifications using any mode of delivery (such as full time, part time, evening only, distance learning) that meets their learners' needs. Whichever mode of delivery is used, centres must ensure that learners have appropriate access to the resources identified in the specification and to the subject specialists delivering the units. This is particularly important for learners studying for the qualification through open or distance learning.

Learners studying for the qualification on a part-time basis bring with them a wealth of experience that should be utilised to maximum effect by tutors and assessors. The use of assessment evidence drawn from learners' work environments should be encouraged. Those planning the programme should aim to enhance the vocational nature of the qualification by:

- liaising with employers to ensure a course relevant to learners' specific needs
- accessing and using non-confidential data and documents from learners' workplaces
- including sponsoring employers in the delivery of the programme and, where appropriate, in the assessment
- linking with company-based/workplace training programmes
- making full use of the variety of experience of work and life that learners bring to the programme.

Resources

Edexcel BTEC Level 2 qualifications are designed to give learners an understanding of the skills needed for specific vocational sectors. Physical resources need to support the delivery of the programme and the assessment of the learning outcomes, and should therefore normally be of industry standard. Staff delivering programmes and conducting the assessments should be familiar with current practice and standards in the sector concerned. Centres will need to meet any specific resource requirements to gain approval from Edexcel.

Where specific resources are required these have been indicated in individual units in the *Essential resources* sections.

Delivery approach

It is important that centres develop an approach to teaching and learning that supports the vocational nature of Edexcel BTEC Level 2 qualifications and the mode of delivery. Specifications give a balance of practical skill development and knowledge requirements, some of which can be theoretical in nature. Tutors and assessors need to ensure that appropriate links are made between theory and practical application and that the knowledge base is applied to the sector. This requires the development of relevant and up-to-date teaching materials that allow learners to apply their learning to actual events and activity within the sector. Maximum use should be made of learners' experience.

Additional and specialist learning

Additional and Specialist Learning (ASL) consists of accredited qualifications at the same level as, or one level above a 14-19 Diploma course of study, which have been approved under Section 96 of the Learning and Skills Act 2000. The ASL may include BTEC qualifications which are also available to learners not following a 14-19 Diploma course of study.

ASL qualifications are listed on the 14-19 Diploma Catalogue which is available on the Register of Regulated Qualifications (www.ofqual.gov.uk). The catalogue will expand over time as more qualifications are accredited and approved.

Centres undertaking, or preparing to undertake, ASL should refer regularly to the Edexcel website for information regarding additions and the 14-19 Diploma Catalogue for the latest information.

Access and recruitment

Edexcel's policy regarding access to its qualifications is that:

- they should be available to everyone who is capable of reaching the required standards
- they should be free from any barriers that restrict access and progression
- there should be equal opportunities for all wishing to access the qualifications.

Centres are required to recruit learners to BTEC qualifications with integrity. This will include ensuring that applicants have appropriate information and advice about the qualifications and that the qualification will meet their needs. Centres should take appropriate steps to assess each applicant's potential and make a professional judgement about their ability to successfully complete the programme of study and achieve the qualification. This assessment will need to take account of the support available to the learner within the centre during their programme of study and any specific support that might be necessary to allow the learner to access the assessment for the qualification. Centres should consult Edexcel's policy on learners with particular requirements.

Centres will need to review the entry profile of qualifications and/or experience held by applicants, considering whether this profile shows an ability to progress to a higher level qualification.

Restrictions on learner entry

The Edexcel BTEC Level 2 qualifications in WorkSkills for Effective Learning and Employment are accredited on the QCF for learners aged 16 and above.

Access arrangements and special considerations

Edexcel's policy on access arrangements and special considerations for BTEC and Edexcel NVQ qualifications aims to enhance access to the qualifications for learners with disabilities and other difficulties (as defined by the 1995 Disability Discrimination Act and the amendments to the Act) without compromising the assessment of skills, knowledge, understanding or competence.

Further details are given in the policy document *Access Arrangements and Special Considerations for BTEC and Edexcel NVQ Qualifications*, which can be found on the Edexcel website (www.edexcel.com). This policy replaces the previous Edexcel policy (*Assessment of Vocationally Related Qualifications: Regulations and Guidance Relating to Learners with Special Requirements, 2002*) concerning learners with particular requirements.

Recognition of Prior Learning

Recognition of Prior Learning (RPL) is a method of assessment (leading to the award of credit) that considers whether a learner can demonstrate that they can meet the assessment requirements for a unit through knowledge, understanding or skills they already possess and so do not need to develop through a course of learning.

Edexcel encourages centres to recognise learners' previous achievements and experiences whether at work, home or at leisure, as well as in the classroom. RPL provides a route for the recognition of the achievements resulting from continuous learning.

RPL enables recognition of achievement from a range of activities using any valid assessment methodology. Provided that the assessment requirements of a given unit or qualification have been met, the use of RPL is acceptable for accrediting a unit, units or a whole qualification. Evidence of learning must be sufficient, reliable and valid.

Unit format

All units in Edexcel BTEC Level 2 specialist qualifications have a standard format. The unit format is designed to give guidance on the requirements of the qualification for learners, tutors, assessors and those responsible for monitoring national standards.

Each unit has the following sections.

Unit title

The unit title is accredited on the QCF and this form of words will appear on the learner's Notification of Performance (NOP).

Unit code

Each unit is assigned a QCF unit code that appears with the unit title on the National Database of Accredited Qualifications.

QCF level

All units and qualifications within the QCF will have a level assigned to them, which represents the level of achievement. There are nine levels of achievement, from Entry Level to Level 8. The level of the unit has been informed by the QCF level descriptors and, where appropriate, the NOS and/or other sector/professional benchmarks.

Credit value

All units have a credit value. The minimum credit value that may be determined for a unit is one, and credits can only be awarded in whole numbers. Learners will be awarded credits for the successful completion of whole units.

Guided learning hours

Guided learning hours are defined as all the times when a tutor, trainer or facilitator is present to give specific guidance towards the learning aim being studied on a programme. This definition includes lectures, tutorials and supervised study in, for example, open learning centres and learning workshops. It also includes time spent by staff assessing learners' achievements. It does not include time spent by staff in day-to-day marking of assignments or homework where the learner is not present.

Unit aim

The aim provides a clear summary of the purpose of the unit and is a succinct statement that summarises the learning outcomes of the unit.

Unit introduction

The unit introduction gives the reader an appreciation of the unit in the vocational setting of the qualification, as well as highlighting the focus of the unit. It gives the reader a snapshot of the unit and the key knowledge, skills and understanding gained while studying the unit. The unit introduction also highlights any links to the appropriate vocational sector by describing how the unit relates to that sector.

Learning outcomes

The learning outcomes of a unit set out what a learner is expected to know, understand or be able to do as the result of a process of learning.

Assessment criteria

The assessment criteria of a unit specify the standard a learner is expected to meet to demonstrate that a learning outcome, or set of learning outcomes, has been achieved. The learning outcomes and assessment criteria clearly articulate the learning achievement for which the credit will be awarded at the level assigned to the unit.

Unit content

The unit content identifies the breadth of knowledge, skills and understanding needed to design and deliver a programme of learning to achieve each of the learning outcomes. This is informed by the underpinning knowledge and understanding requirements of the related National Occupational Standards (NOS), where relevant. The content provides the range of subject material for the programme of learning and specifies the skills, knowledge and understanding required for achievement of the unit.

Each learning outcome is stated in full and then the key phrases or concepts related to that learning outcome are listed in italics followed by the subsequent range of related topics.

Relationship between content and assessment criteria

The learner should have the opportunity to cover all the unit content.

It is not a requirement of the unit specification that all the content is assessed. However, the indicative content will need to be covered in a programme of learning in order for learners to be able to meet the standard determined in the assessment criteria.

Content structure and terminology

The information below shows how the unit content is structured and gives the terminology used to explain the different components within the content.

- Learning outcome: this is shown in bold at the beginning of each section of content.
- Italicised sub-heading: it contains a key phrase or concept. This is content which must be covered in the delivery of the unit. Colons mark the end of an italicised sub-heading.
- Elements of content: the elements are in plain text and amplify the sub-heading. The elements must be covered in the delivery of the unit. Semi-colons mark the end of an element.
- Brackets contain amplification of content which must be covered in the delivery of the unit.
- 'eg' is a list of examples, used for indicative amplification of an element (that is, the content specified in this amplification could be covered or could be replaced by other, similar material).

Essential guidance for tutors

This section gives tutors additional guidance and amplification to aid understanding and a consistent level of delivery and assessment. It is divided into the following sections.

- *Delivery* – explains the content's relationship to the learning outcomes and offers guidance about possible approaches to delivery. This section is based on the more usual delivery modes but is not intended to rule out alternative approaches.
- *Assessment* – gives amplification about the nature and type of evidence that learners need to produce in order to achieve the unit. This section should be read in conjunction with the assessment criteria.
- *Essential resources* – identifies any specialist resources needed to allow learners to generate the evidence required for each unit. The centre will be asked to ensure that any requirements are in place when it seeks approval from Edexcel to offer the qualification.
- *Indicative resource materials* – gives a list of learner resource material that benchmarks the level of study.

Unit 1: Preparing for an Apprenticeship

Unit code:	H/602/4529
QCF Level 2:	BTEC Short Course
Credit value:	1
Guided learning hours:	10

Unit aim

The aim of this unit is to enable learners to successfully plan for their Level 2 Apprenticeship.

Unit introduction

This unit is designed to support learners' understanding of, and induction to, their Apprenticeship and to help them develop an understanding of why components are present and assessed in particular ways. The unit is designed to help learners plan their learning. Learners are introduced to the importance of time management and personal management in the successful completion of their Apprenticeship. Delivery of this unit could form part of learner induction.

Learning outcomes and assessment criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

On completion of this unit a learner should:

Learning outcomes	Assessment criteria
1 Know the components of the Apprenticeship	1.1 Discuss the relevance of each of the components 1.2 Describe how each component will be assessed 1.3 Describe the purpose of the Apprenticeship agreement
2 Be able to set goals for the coming year	2.1 Describe the importance of meeting deadlines 2.2 Describe the importance of being organised 2.3 Create targets for own skills development and completion of the Apprenticeship
3 Understand the progression routes	3.1 Discuss the sources of information regarding progression routes 3.2 Compare possible progression routes

Unit content

1 Know the components of the Apprenticeship

Components: components within the Apprenticeship framework for the sector eg competence and knowledge-based qualifications, functional skills, employee rights and responsibilities, personal, learning and thinking skills; choosing units allowed in the framework

Assessment: gathering evidence eg on the job, off the job, witness statements, use of videos and tapes, observation sheets; exams and tests eg online, paper based; preparation for tests and exams eg revision techniques, revision timetable, practice papers; completing coursework eg organisation of folders, cross referencing; review visits; holistic assessment

The Apprenticeship agreement: as set out in legislation and regulations; employee and employer obligations; contents of the agreement; time limitations in the agreement

2 Be able to set goals for the coming year

Organisational skills: time keeping; study timetable eg week planner, calendar of assessment and review dates; where to study eg a quiet room, library, college; folders for keeping notes organised

Appropriate targets: arising from prior learning and experience; personal targets eg arrive on time, attend each day, dress appropriately; work-related targets eg learn a new skill, follow instructions, find out about the job role, ask appropriate questions if something is unclear

Setting targets: SMART targets—specific, measurable, achievable, realistic, time bound

3 Understand the progression routes

Sources of information for progression routes: Connexions, Jobcentre Plus, tutor, local colleges' websites and prospectuses, websites eg Apprenticeships, employment websites

Progression routes: further learning including BTEC qualifications, general qualifications, Diplomas; employment; higher Apprenticeships

Essential guidance for tutors

Delivery

This unit is designed to be taken within the context of any sector appropriate for the Apprenticeship learners are undertaking. The unit can be used to support induction. Delivery could start by studying the Apprenticeship framework and discussing why components are present and their purpose. Learners should understand why components are assessed in certain ways. They should also understand the main aspects of the Apprenticeship agreement.

The learning outcomes enable learners to develop an individual learning plan. Tutors will need to take a flexible approach when delivering the content of this unit, as learners could be engaged in on-the-job training or attending a training centre on day release.

The intention of this unit is to ensure that learners understand the apprenticeship and how they are to be assessed throughout. The unit should be delivered as near to the start of the course as possible.

Assessment

The assessment for this unit could include written work such as a portfolio of evidence. Evidence could be a log of 1:1 tutorial sessions, or a log created independently by the learner. All evidence needs to be kept for internal and external quality assurance and assessment. The assessment criteria for each learning outcome can be assessed together or individually. It is essential that the evidence for each criterion is recorded.

Essential guidance for tutors

Delivery

This unit includes topics which apply generally, and others which apply specifically to the learner's workplace. Input should be as varied as possible making good use of internet resources and websites, together with group work, individual study and team activities as well as more traditional written tasks. Learners should be encouraged to read around the subject to gain more understanding of the contents of the relevant legislation.

Visiting speakers, who work in various parts of the organisation or who work for associated organisations, would greatly enliven the programme. All study should be related to the workplace.

Unit 4: Employment Opportunities and Career Progression

Unit code:	D/602/4531
QCF Level 2:	BTEC Short Course
Credit value:	1
Guided learning hours:	10

Unit aim

The aim of this unit is to allow learners to research their chosen vocational sector and subsector, gaining an idea of size, importance and structure as well as career opportunities.

Unit introduction

In this unit learners will research the key features of their chosen vocational sector, looking at its size at local and national levels. They will find out about the roles of key organisations within the sector, including regulatory bodies and trade unions, and develop knowledge of the drivers of change within their sector.

Learners will then narrow their research on a chosen subsector, again considering its size and scope within the local and national picture.

Finally, they will consider the job roles within their vocational sector and the qualifications and training needed to progress within the sector.

Learning outcomes and assessment criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

On completion of this unit a learner should:

Learning outcomes	Assessment criteria
1 Know the key features of a vocational sector	1.1 Describe the size and scope of a vocational sector at local and national level 1.2 Outline the roles of key organisations in a vocational sector 1.3 List reasons for future developments in a vocational sector
2 Know the key features of a vocational subsector	2.1 Identify the main subsectors of a vocational sector 2.2 Describe a subsector in terms of its local impact
3 Be able to establish own employment and career opportunities in a vocational sector	3.1 Identify the main job roles within a vocational sector 3.2 Outline progression routes within a vocational sector 3.3 Plan own education and training requirements within a vocational sector 3.4 Consult sources of advice and guidance to inform own career planning

Unit content

Essential guidance for tutors

Delivery

This unit is designed for delivery within a college environment or within the workplace. Learners may use this unit to study a vocational sector of their choice, as agreed with the tutor. Learners should hone their investigative skills, researching their chosen vocational sector and subsector locally and nationally. They could contact any or all of the bodies suggested below. Ideally, tutors should invite speakers to give presentations and participate in question and answer sessions to facilitate learner research. Visits to relevant vocational centres and places of employment could all contribute to learning.

It is always a good idea to start by finding out what learners already know, so a thought shower of information related to the topic could be carried out in small groups then fed back to the whole group as a summary.

Research could then be undertaken in pairs, dividing up topics amongst learners, with a plenary to feed back findings to the whole group.

Learners requiring more support could be given direction for example topic headings to follow up or signposting to helpful websites.

Assessment

Learners should produce a portfolio or a PowerPoint presentation covering the key points of the assessment criteria. This may include illustrations, diagrams, charts and maps as well as text and notes.

Essential resources

Accesses to the internet for research purposes and to a library are essential requirements.

It would be useful for learners to speak with people in their vocational sector and subsector and to visit places of employment.

Input should be as varied as possible making good use of internet resources and websites, together with group work, individual study and team activities as well as more traditional written tasks. Learners should be encouraged to read around the subject to gain more understanding of the contents of the relevant legislation.

Visiting speakers would enhance the programme. All study should be related back to the workplace.

Assessment

Learners could produce a report on their employing organisation, its functions and reporting structure for learning outcomes 1 and 2. This may be handwritten or, preferably, using ICT. Essential guidance for tutors

Delivery

This unit includes topics which apply generally, and others which apply specifically to the learners' workplace. Input should be as varied as possible making good use of internet resources and websites, together with group work, individual study and team activities as well as more traditional written tasks. Learners should be encouraged to read around the subject to gain more understanding of the contents of the relevant legislation.

Visiting speakers would enhance the programme. All study should be related to the workplace.

Assessment

This unit is assessed through a portfolio of evidence.

A variety of assessment methods could be used. Learners could produce written reports or give verbal presentations, supported by witness testimony. Other alternatives could be logbooks or workbooks completed in the workplace or during visits.

Unit 7: Using Enquiry and Investigative Techniques to Solve Problems

Unit code: K/602/4547
QCF Level 2: BTEC Short course
Credit value: 1
Guided learning hours: 10

Unit aim

The aim of this unit is to enable learners to think creatively and enquire independently to solve problems through a short directed enquiry.

Unit introduction

This unit is designed to enable learners to use research to solve problems. Learners could use the unit to guide their enquiry into work-based or study-based problems. The unit covers the creative thinking and independent enquirer areas of PLTS. The unit is designed to complement other courses of study and could be built into these courses enabling research and idea generation to take place.

The creative thinking encourages learners to generate ideas, tackle problems and find imaginative solutions. Learners inquire independently through undertaking small scale research, planning and carrying out investigations and making informed decisions.

Learning outcomes and assessment criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

On completion of this unit a learner should:

Learning outcomes	Assessment criteria
1 Be able to research questions related to a specific problem	1.1 Generate ideas for enquiry which result from a specific identified problem 1.2 Define enquiry questions relating these to the specific problem 1.3 Identify investigative techniques to use that meet the aims of the enquiry 1.4 Create a structured plan for the enquiry 1.5 Conduct the enquiry following the plan
2 Be able to assess enquiry outcomes on a specific problem	2.1 Select the information that is useful and relevant from the data 2.2 Assess the findings referring to the intentions in the enquiry plan 2.3 Explain the factors that influenced decisions in the methodology 2.4 Identify assumptions in methodology used 2.5 Discuss the impact alternative investigation methods could have on the outcomes

Unit content

1 **Be able to research questions related to a specific problem**

Problem: work related, study related

Generating ideas: various techniques eg brainstorming

Enquiry questions: underlying objectives of research which inform the more specific questions that may be asked in the methodology

Planning: brief plan including research questions; any supporting theory or subject matter, methodology, methods, timescale

Investigation techniques: primary and secondary sources; collection of data eg qualitative, quantitative; research methods eg questionnaires, surveys, documents, observation

Findings: recording information; presentation eg report, audio-visual

2 **Be able to assess enquiry outcomes on a specific problem**

Assessment of findings: against the original questions asked, against the topic concerned; ability to form a response to the question using findings

Assumptions: questions that interrogate the validity of the enquiry results, number of results that are needed to establish proof, statistical significance

Alternatives: primary eg different sources of research, qualitative eg other websites, books, journals

Essential guidance for tutors

Delivery

The emphasis in this unit is on developing learners' knowledge and understanding of, and skills in processes so that they are able to plan and carry out investigations as well as generate ideas and solutions.

The unit should ideally be offered within the context of other learning so that problems, ideas generated and research undertaken is relevant for learners.

The unit is designed to provide a brief introduction to and experience of carrying out research. Research undertaken is likely to be small scale with a small sample, and could involve only research of secondary evidence. Nevertheless, learners should be encouraged to critique types of evidence and to begin to question how valid certain types of research are. For example, to find out customer views on a particular product it is more valid to ask them than to personally critique the product in question.

The unit should be as practical as possible, ensuring that learners see how they can apply their new skills to real situations.

Assessment

Assessment for this unit could include a portfolio of evidence comprising witness statements, photographs, video clips, tapes, written work or a completed training manual, all of which need to be kept for both internal and external quality assurance. The assessment criteria for each learning outcome can be assessed together or individually. It is essential that the evidence for each criterion is recorded. Tutors should ensure that learners are given regular 1:1 feedback on their progress. They could use a series of questions to ask learners to confirm that their evidence meets all the assessment criteria.

The assessment criteria are referenced to the creative thinkers and independent enquirers PLTS. Satisfactory completion of all criteria ensures that all aspects of creative thinkers and independent enquirers have been covered.

Responses to assessment criteria are expected to be brief but relevant and could be conveyed within a plan and write up of a research experience that covers all criteria.

The assessment could be completed in a work placement where learners are working with other colleagues or during activities in the learning centre.

QCF Level 2: BTEC Short Course

Credit value: 1

Guided learning hours: 10

Unit aim

The aim of this unit is to enable learners to complete a task as a member of a team drawing on an agreed code of conduct.

Unit introduction

Any employee or potential employee should understand the importance of effective people skills to their career and also to the organisation where they work. A great deal depends on the ability of individuals to work with colleagues in a positive and cooperative manner.

This unit introduces learners to the idea of creating a code of conduct to maximise the team's effectiveness and success. Learners have the opportunity to put their new knowledge into practice.

This unit covers the PLTS performance indicators for both effective participators and team workers.

Learning outcomes and assessment criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

On completion of this unit a learner should:

Learning outcomes	Assessment criteria
1 Understand the need for a team to work to an agreed code of conduct	1.1 Contribute to discussion with others to agree a team task that contributes to the local context 1.2 Contribute to discussion with team members to agree a code of conduct for effective teamwork 1.3 Describe agreed consequences for team members who do not follow the code of conduct

Completion of task to required standard and deadline: carry out own tasks to appropriate standard within agreed timescale

Help, support and advice to team members: offer to help team member who is having difficulty carrying out their task, suggest a better way of doing something, agreeing to take on an extra task when a fellow team member is absent

Essential guidance for tutors

Delivery

Tutors will need to take a flexible approach when delivering the content of this unit, as learners could be engaged in on-the-job training, studying in schools, colleges or training centres.

The selected team task should be relevant locally and enable learners to become effective participators in their local environment be this school, the workplace, a community group or a social group. The unit could be delivered within the context of another course of learning such as a vocational qualification where opportunities to undertake teamworking may materialise. Alternatively, the qualification may support citizenship learning. It is important that learners have the opportunity in the task to show they can take responsibility for their actions.

The emphasis in this unit is on developing learners' knowledge and skills so that they can work effectively alongside colleagues or peers. The unit should be as practical as possible, ensuring that learners see how they can apply their new skills to real situations.

Assessment

The assessment criteria for each learning outcome can be assessed together or individually. It is essential that the evidence for each criterion is recorded. Tutors should ensure that learners are given regular 1:1 feedback on their progress. Tutors could use a series of questions to ask learners to confirm that their evidence meets all the assessment criteria.

The assessment criteria are referenced to the team working and effective participators PLTS. Satisfactory completion of all the assessment criteria ensures that all aspects of these PLTS have been covered.

The assessment for the task could be completed in a work placement where the learner is working with other colleagues.

Credit value: 1

Guided learning hours: 10

Unit aim

The aim of this unit is to enable learners to organise and prepare their learning and to reflect on what they have done.

Unit introduction

This unit allows learners to develop skills within the PLTS framework and therefore can be assessed in conjunction with other units that they are studying. The focus is on process as well as outcomes. Learners should develop an understanding of the processes to help to improve their own learning. The emphasis of the unit is on empowering learners to work independently. This unit should be delivered over a length of time to give learners the opportunity to develop their skills.

The areas of the PLTS framework that this unit covers are self managers and reflective learners.

Learning outcomes and assessment criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Outcomes of learning: positive experiences, lessons learned

Essential guidance for tutors

Delivery

Tutors will need to take a flexible approach when delivering the content of this unit, as learners could be engaged in full-time study or on-the-job training. The unit could be delivered alongside an experiential unit from another programme to enable learners to plan their work and measure achievement. At this level, learners are expected to show skills in managing their own learning and relating positively with others.

The emphasis in this unit is on developing learners' skills and helping them to understand the processes used to enable better self-organisation and to reflect on their learning. The content of the unit could be delivered through one-to-one tutorials and group work, but learners may be able to work individually on their learning goals.

Assessment

Assessment for this unit could include written work and tapes, video or audio. It is likely to be through a portfolio of evidence or a logbook which records learning goals and achievements as learners progress through a programme of learning. This evidence could form part of a wider portfolio for another qualification, provided it is explicit enough for assessment of this unit.

When communicating outcomes of learning experiences to others, learners are expected to comment generally on the importance of various factors in improving their learning experiences. This could be assessed through a witnessed discussion where learners discuss the outcomes of their experiences.

The assessment criteria are referenced to the self managers and reflective learners PLTS. Satisfactory completion of all the assessment criteria ensures that all aspects of these PLTS have been covered.
